

Health Disparities in HIV/AIDS, Viral Hepatitis, Sexually Transmitted Diseases, and Tuberculosis in the United States

Author: C. Brooke Steele, Lehida Meléndez-Morales, Richard Campoluci, Nickolas DeLuca, and Hazel D. Dean. CDC NCHHSTP Office of Communications

Publication Date: 2007

Country of Origin: United States

Format: Report

Physical Description: 60 p.: col. ill.; graphs, refs.

Language: English

Abstract:

In this report, health disparities are measured by examining differences in HIV/AIDS, viral hepatitis, STDs, and tuberculosis surveillance data with respect to such sociodemographic factors as race/ethnicity, gender, and age. In addition, where possible, disparities are measured by examining differences by sexual orientation and geographic location. This report includes a retrospective review of CDC surveillance data for HIV/AIDS, viral hepatitis, STDs, and tuberculosis over the period 2000-2004.
